

Call for papers – BiogasWorld 2012

Starting in 2012, the international trade fair BiogasWorld organised by ProFair GmbH takes place every second year together with SolarEnergy and bautech at the Berlin Exhibition Grounds. About 70,000 visitors from all over the world will visit the grounds on the five days. Apart from the domestic German market BiogasWorld places a special focus on the Eastern European countries from Poland and the Czech Republic to the Baltic States and Russia.

In particular Poland is seen as a land of the future in the topic of biogas technologies. The country's government and investors have just recently given the green light to accelerate development in this area. Short or medium term the aim is that decentralised electricity and heat from biogas plants will take up its fair share of the basic energy provision for the population and infrastructure requirements in Poland's rural regions.

Whereas in Germany the sales market has already stagnated in several regions and, parallel to new investment, the highly promising area of the „repowering“ of old facilities becomes more and more important, the Eastern European countries are regarded as virgin territory for biogas applications with considerable development prospects.

Informationen for exhibitors can be found at: <http://www.messen-profair.de/BioGasWorld.html>

Within this trade fair the IBBK Fachgruppe Biogas organises several events, including an international symposium. For this symposium we look for interesting presentations on (research) projects, plant concepts and operating plants.

The international symposium „Anaerobic Digestion of Solid Biomass and Biowaste“ takes place on Thursday, February 23 and Friday, February 24. Co-operation partner is the Polish Biogas Association. The symposium is financially supported by the Agency for Renewable Resources (FNR) within the project 4Biomass. The Ökobit GmbH is sponsor of the symposium.

Anaerobic Digestion of Solid Biomass and Biowaste

Thursday, February 23, 09:30 am – 17:30 pm & Friday, February 24, 09:30 am – 17:00 pm

Proposed topics:

- Anaerobic digestion of grass, landscape maintenance waste, food leftovers, biodegradable waste etc.
- Co-fermentation in agricultural biogas plants
- Co-fermentation in sewage treatment plants
- Pre-treatment of substrate, hygienisation, treatment of digestate
- Preceding anaerobic digestion before composting of biodegradable waste
- MBT with anaerobic digestion
- Gas cleaning, gas upgrading, biogas / sewage gas from as vehicle fuel
- Implemented examples and on-going (research) projects (focus on Eastern Europe, esp. Poland) of the mentioned topics

Languages:

German & English with simultaneous translation
At least on one day there will be a translation into Polish, too.

Conditions of participation:

- Speakers get free entrance to the fair on all days
- Speakers get free entrance to the international symposium on both days
- On both days of the international symposium lunch and beverages are free
- Travel & accomodation has to be organised and paid by the speakers themselves
- Deadline for submission is on October 07, 2011
- For accepted presentations the speaker has to submit an English summary (as doc-file) not later than January 15, 2012 for printing the proceedings (will be published with ISBN number). The template will be sent after acceptance of the submitted abstracts.
- For the accepted presentations the speaker has to submit the English slides (as ppt- and pdf-file) not later than February 10, 2012.

In Co-operation with:

This project is implemented through the CENTRAL EUROPE Programme co-financed by the ERDF.
